Kalit so'zlar: Uchinchi uyg'onish davri, besh tashabbus, harakatlar strategiyasi, barkamol avlod.

Ключевые слова: Третий ренессанс, пять инициатив, стратегия действий, гармонично развитое поколение.

Keywords: Third renaissance, five initiatives, action strategy, harmoniously developed generation.

Annotatsiya: Ushbu maqolaning mazmuni uchinchi renessans davriga asos solinishi, ta'lim tizimini tubdan isloh qilinishi va yoshlarning ma'naviy kamolotini yuksaltirish masalalarini tahlil qilish, hamda yoshlarga yaratib berilayotgan imkoniyatlardan unumli foydalanishga targ'ib qilishdir.

Аннотация: Целью данной статьи является анализ вопросов становления Третьего Ренессанс, кардинального реформирования системы образования и поднятия морального духа молодежи, а также содействие эффективному использованию возможностей, созданных для молодежи.

Annotation: The purpose of this article is to analyze the issues of establishing the Third Renaissance, radically reforming the education system and raising the morale of young people, as well as to promote the effective use of opportunities created for young people.

There are many countries in the world that are developing and moving towards development. At the same time, Uzbekistan is striving to be known in the world with its voice.

The role of our first President in achieving the independence of Uzbekistan is great. He said that man's efforts on this path have led him to meet the long-awaited bright days. Since then, our country has undergone various changes. Especially our president - Sh.Mirziyoyev was deemed worthy of the presidency, Uzbekistan began a radical renewal. At the initiative of our President, our country has gone through many stages of development over the past 5 years and has signed a number of agreements based on equal interests in different parts of the world. These changes are observed not only in one area, but in all areas, including political, trade, technical and others. At the initiative of the President, the Action Strategy for the five priority areas of rapid development of the Republic of Uzbekistan for 2017-2021 has been announced. The priority of this strategy is to further strengthen the role of parliament in deepening democratic reforms aimed at improving the state and society. It is safe to say that the creative work taking place in our country is also entertaining. Our capital Tashkent and almost all regions of the country are becoming more beautiful. In particular, in many districts and villages, and even in the provinces, the quality of roads, schools and hospitals does not meet modern standards. As a result, several problems arise and are certainly having an impact. One of the big projects was the construction of an underground subway in Tashkent's Sergeli district. The metro line is being built in a completely new, modern way, not only in Uzbekistan, but also in Central Asia. The future of Uzbekistan will be great if we can quickly respond to such opportunities created by the state, if we can put these opportunities into practice. The head of state drew the attention of ordinary people. The role of senators and deputies should be invaluable in raising the awareness of the people, listening to their problems, and promoting the significant work being done at the state level. The head of state also stressed this issue in his speech to the Oliy Majlis in 2018. Today radical changes are taking place in the field of education, which in turn has a great impact on the comprehensive, strong, healthy and spiritual development of educated youth.

The population of Uzbekistan exceeds 33 million, of which more than 17 million are young people. Therefore, raising the level of education of young people is one of the most important issues today. In particular, in order to bring the created conditions to a new level, the head of our state Sh.Mirziyoyev adopted a decree "On measures to radically reform the state youth policy in the Republic of Uzbekistan and bring it to a new level", as well as to involve young people in science and innovation, to educate youth in leading foreign countries. We all know that a wide range of opportunities are being created for talented young people to become successful professionals in the future. The fact that 2021 has been declared the Year of Youth Support and Public Health is another sign of the focus on youth. This was the basis for a radical change in the worldview of our youth. The opportunities provided to young people can be explored through the 5 initiatives taken by our leader.

The first initiative is to increase the interest of young people in music, painting, literature, theater and other arts, to reveal their talents.

The second initiative is aimed at creating the necessary conditions for physical training of young people, to demonstrate their abilities in sports.

The third initiative is aimed at creating effective use of computer technology and the Internet among the population and youth.

The fourth initiative is aimed at raising the morale of young people, the organization of systematic work to promote reading among them.

These five initiatives will pave the way for a radical transformation of the efforts of talented and educated youth.

Presidential grants have been introduced for 200 young people who have scored the highest marks in the entrance exams to higher education institutions at the youth forum of the head of state to encourage young people who are thirsty for knowledge and enthusiasm.

Two or more children preferential education loans for families studying at the university on a contract basis. Another good news is that in order to support our talented young people who have chosen the path of science, it is necessary to double the quota of presidential scholarships for master's and doctoral degrees from next year. Many reforms are underway, especially to support our youth in all areas. At the same time, 120 IT centers across the country are being completed by about 4,000 people included in the "Youth Book". In order to provide such young people with computers for business in the future, students who received a certificate in the project "One Million Programmers" were allocated loans for the purchase of computers for the Communications Bank and the People's Bank, whose interest costs will be fully covered from the budget. In other words, the loan is provided without interest. In order to provide such young people with computers for business in the future, students who received a certificate in the project "One Million Programmers" were allocated loans for the purchase of computers for the Communications Bank and the People's Bank, whose interest costs will be fully covered from the budget. In other word "The future and prosperity of our planet depends on how our children grow up to be human beings. Our main task is to create the necessary conditions for young people to show their potential," the head of state said. The content of this article is that the foundation of the Third Renaissance is the youth, as well as the radical reform of the education system, the spiritual development of young people. Great attention is paid to the upbringing of physically fit people, to show them how to take advantage of the opportunities created for them.
