Annotation: In this article, the American education system, which is considered advanced today coherence and continuity, educational stages are described in detail in sequence. It includes the main functions of pre-school education, secondary education and higher education revealed, in addition, about the volume and quality of hours allocated for classes data and conclusions are presented.

Key words: educational system, continuous education, educational content, gradation, coherence, purpose, tasks, types of education.

The United States is very densely populated. It consists of 50 states. The USA is also the best and best country to work in because it is in the world there are the most reputable companies. If anyone wants to settle in the US, it's him should think about their children's education. The education program in the USA is the best in the world is known to be one of the best educational programs. Study style in US schools slightly different than other western countries. They are not theoretical knowledge, rather, they pay more attention to practical knowledge. Also the most prestigious in the world education in one of the educational systems will help you stand in the light. Also, the US spends more money on student education than any other country in the world spends This is one of the reasons why the US education system is one of the best is one. The literacy rate in the United States is about 99 percent is enough. To provide their citizens with the necessary basic information due to the unifying law. This state law ranges from ages 6-8 to 16-18 forces every student to learn. Although this is preschool education Although it does not apply to institutions, it varies from state to state. America There are private, public, and home schools in the United States. in the United States the majority of students (about 87%) attend public or public schools. Another part of students (about 10%) go to private schools, and the rest are home

they go to school. The structure of the education system in the United States of America is as follows:

1) preschool education where children are educated from 3 to 5 years old institutions;

2) Primary schools up to grades 1-8 (from 6 years old in such schools they study until the age of 13);

3) secondary schools with grades 9-12 (in these schools children up to the age of 14-17 children get education). It consists of a lower and upper stage.

4) The next level of education in the United States is higher education, which is 2 or 4-year colleges and universities and other higher educational institutions postgraduate or doctorate courses organized as part of it.

Schools in the USA

Children start school at 5 or 6 years old and are 17 or 18 years old finish □ The student has to repeat the lesson due to extended leave or lack of class comes, but it is very rare.

□ 12 years of study in total.

□ Elementary (elementary) school has grades 1 to 5.

□ A junior high or high school comprises grades 6-8.

□ High school has grades 9 to 12.

Compulsory education for all children in the United States. Attends school the age limit varies from country to country. In some states, students are 14–17 years old they can leave the school with the permission of their parents. However, another students must stay in school until they are 18 years old. Public education is usually children

Kindergarten through 12th grade (K-12) is free. Most parents send their children to public or private institutions. According to state statistics, one-tenth of students are in private schools studied About 85 percent of students study in public schools.

Private schools are generally free to set their own curriculum. Independent available through regional accreditation bodies, but some state regulations can be

used.

1. Annual budget (2016-2017): 1.3 trillion. USD (7.2% of GDP) (public and private, all levels)
2. Male and female literacy rate: 100%
3. Education Level (Secondary and Post-Graduate): 91% and 46%
4. Main language: English.

Pre-primary school Childcare in the US is usually between 5 and 6 years old. Before school education is called kindergarten schools. Secondary special education Secondary school refers to secondary school or high school. High school usually begins between the ages of eleven and twelve and lasts for three years. Secondary school starting from sixth grade to eighth grade. Teaching in secondary schools this type is also free in the US. High school is the most necessary part of education. This is the profession that the student himself wants determines the selection stage. High school is usually fourteen or fifteen years old begins and ends around the age of eighteen. High school students are the main ones allows you to choose subjects. High school here often refers to graduation or college. This stage forces students to study related subjects in colleges or universities. Also, the path to masters even after students graduate from college or university can get

School hours and deadlines

- School starts in September and runs until May or June (nine months).
- Most schools use a two-semester system. From September until December and spring from January to May.
- Some schools follow quarter system. It includes three sessions. September to December, January to March and March to May to June. A distinctive feature of the American higher education system is that the student studies the ability to change its "primary" direction several times during. Americans often use this opportunity. This means that the highest in the process of obtaining information, the student begins to like another specialty, and in this regard. American universities are very flexible. classes in universities are different varies: from large

lectures for several hundred students to a few to small lessons and seminars (discussions) for students. America the atmosphere in university classrooms is very lively. You have your own opinion defend your point of view, participate in discussions and presentations you are allowed to prepare. These are the aspects of foreign students in the United States often surprises. In conclusion, it should be noted that today it is considered advanced The integrity and continuity of the American education system, the sequence of educational stages, in it, among other things, the main functions of preschool education, secondary education and higher education revealed, in addition, about the volume and quality of hours allocated for classes it is necessary to draw the necessary conclusions from the data, taking into account the local experience
